

## WHY CHOOSE US

### We listen to you

Your website is about your business, not ours. One of our local consultants will meet with you to learn about your business, and the sort of website you need.

### We serve as local

With a network of sales and support executive based throughout the India we're right on your doorstep. From the first point of contact onwards, we remain on hand to help - even after your website and software has gone live.

## WE WILL HELP GROW YOUR BUSINESS

First, we understand you and your company, then our skilled designers and developers create your website from the ground up. We never use templates - so you get exactly what your business needs. A unique website created with you, not by you.

*Our website solution is perfect for all businesses looking to establish a professional online presence*

## WHY WEBSITE?

### Why Your Business Needs a Website

#### Your customers expect it.

Six out of ten consumers expect brands to provide online content about their business on some form of digital property. If you don't have a business website, today's digital-savvy client may look elsewhere.

#### You control the narrative.

It's true that you cannot control what others say about you on social media channels, but you can influence public perception by creating your own story via a business website.

#### Competitors have websites.

Studies show that once a consumer has an idea of what they want, they start researching, and 72 percent of them go online to find educational material, reviews, and testimonials, according to a recent report.

#### Showcase your services.

Not only can you display your products or outline your services in detail with beautiful images, but you can provide short video tutorials or downloadable PDF instructions to give hesitant customers no reason to go elsewhere to purchase.

#### You'll show up in Google.

81 percent of consumers go to Google and type some keywords, like "best school in my area" or, if they know what they want, if you don't have a business website, the chances of showing up on the Google are zero. But if you have a site, you can optimize it, thereby increasing your chances of appearing at the top of Google's results

## WHY CHOOSE US?

Find out why thousands of businesses have chosen Priyansusoft.
